

iDICS INTERNATIONAL
DIGITAL IMAGE CORRELATION
SOCIETY
VIRTUAL CONFERENCE 2020

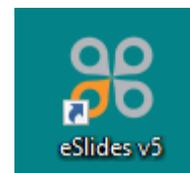

Prepare
your presentation
in 5 steps

Step 1 - Install the software

Note that the eSlides software is currently available for Windows only in both English and French (a version for Apple will be developed later this year). If your computer is under iOS, please ask a colleague to get a PC ready to record your video, or use Bootcamp to boot on the Windows partition.

Download the file "Setup.msi" and install the software eSlides on your computer. (If needed don't forget to authorize Windows or your antivirus to install eSlides.)

Launch the eSlides software by double-clicking on the shortcut installed on your desktop. Click on "Speaker Access", then enter the name of the conference (IDICS2020), your email address and the password which you have received.

A screenshot of the eSlides Login window. The window title is "eSlides Login". It features two language selection icons: France and United Kingdom. Below the icons are two radio buttons: "Manager Access" (unselected) and "Speaker Access" (selected). There are three input fields: the first contains "IDICS2020", the second contains "your email address", and the third contains "*****". A yellow "Submit" button is located at the bottom center.

Step 2 – Set up your recording

Choose your webcam, your microphone and your screen (the one on which you will launch your Powerpoint presentation). Then click on "Save the configuration".

A screenshot of the "eSlides Room Desktop Software 5.0" configuration interface. The window title is "eSlides Room Desktop Software 5.0". The interface has a navigation bar with four tabs: "1. SETTINGS", "2. PRESENTATIONS", "3. SPEAKER MODE", and "4. UPLOADS". The main content area displays "IDICS2020" and "Salle 1 test". On the right, there is a logo for the "INTERNATIONAL DIGITAL IMAGE CORRELATION SOCIETY VIRTUAL CONFERENCE 2020". Below this, there are three configuration panels: "Webcam" (Logitech HD Webcam C270), "Microphone" (Microphone (HD Webcam C270)), and "Screen to record" (Screen 1). In the center, there are two yellow buttons: "Save this configuration" and "Refresh Devices". At the bottom, there are language selection icons (France and UK) and a "Logout" button. The "Powered by e-slides" logo is in the bottom right corner.

Step 3 - Your presentation is already scheduled

The next screen displays the title of your presentation already accepted by the organizer, and your previous tests, if any.

Step 4 - Record your oral presentation

Click on “Launch Local Presentation”. Then select on your computer the PowerPoint file to display.

A popup windows appears with control buttons.

If you are ready to record your presentation, launch the slide show which will cover all your screen size. (Tips: the shortcut to launch the slide show is F5.)

Click on the red button “Record” and begin your presentation. Keep an eye on your watch and try to respect your 20-min slot!

At the end of the PowerPoint presentation, the recording stops automatically.

Step 5 – Transfer your presentation

On the “Uploads” screen, you can click on the “See preview” link to preview your current recording before transferring it to the organizer. If you are not satisfied with the result, you can start again the recording (go back to the “Speaker mode”). Please note that it is a luxury compared to the conditions of a real conference...

The screenshot shows the 'UPLOADS' screen of the eSlides Room Desktop Software 5.0. The main heading is 'IDICS2020 Salle 1 test'. Below this, there is a section for 'Presentation scheduled for 2020/07/01 at 08:00 : List of recorded versions'. A preview window for 'Test FOUBERT' is open, showing a video recording of a speaker and a presentation slide. The interface includes buttons for 'Upload All', 'Logout', and 'Upload', along with progress indicators for 'Videos recorded' and 'Videos uploaded' at 50%.

If you are satisfied with you recording, just click on the “Upload” button to transfer your presentation to the organizer. Between the end of the transfer and its appearance on the eSlides site, 10-15 min can occur.

The screenshot shows the 'UPLOADS' screen of the eSlides Room Desktop Software 5.0 after the presentation has been uploaded. The main heading is 'IDICS2020 Salle 1 test'. Below this, there is a section for 'Presentation scheduled for 2020/07/01 at 08:00 : List of recorded versions'. The 'Test FOUBERT' presentation is now listed with a status of 'Présentation publiée'. The interface includes buttons for 'Upload All', 'Logout', and 'Upload', along with progress indicators for 'Videos recorded' and 'Videos uploaded' at 50%.

Presentation	Speaker	Date	Time	Step	Number of versions	Upload
Test FOUBERT	Mr. Claude FOUBERT	2020/07/01	08:00	Présentation publiée	1 version	Re Upload
TUTO enregistre...	Mr. Claude FOUBERT	2020/07/01	09:00	Step 2 / 5: Presentation Video		Upload

And that’s it!

When all the presentations have been collected by the organizer, they will be available for a few days on the virtual conference web site for registered participants only.

Below is an example of a presentation given on a past event.

The slides are displayed as usual on a large window ①. The presenter appears in a second window ② which can be switched with the slides. The third window with the thumbnails ③ allows navigation within the presentation.

The recording of the comments by the speaker follows the progress of the slides.

For any request or assistance, feel free to contact Claude FOUBERT, by phone: +33 2 47 27 33 30 or by email: secretary@idics-2020.org.
